

# URSA MINOR overview (Messier and Caldwell objects)

6 Objects

## Galaxies

| Object            | Const. | Name | Description | Vmag | Size     | Instrument | OIII | UHC | H-β | Distance   | NGC/IC |
|-------------------|--------|------|-------------|------|----------|------------|------|-----|-----|------------|--------|
| C3                | DRA    |      |             | 9.70 | 17'x3.5' | 120 mm     |      |     |     |            | 4236   |
| M81               | UMA    |      |             | 6.90 | 17'x3.5' | 3.5x15     |      |     |     | 13 Mio. Ly | 3031   |
| M82               | UMA    |      |             | 8.40 | 6'x2'    | 8x30       |      |     |     | 13 Mio. Ly | 3034   |
| <b>3 galaxies</b> |        |      |             |      |          |            |      |     |     |            |        |

## Nebula

| Object          | Const. | Name | Description | Vmag | Size | Instrument | OIII | UHC | H-β | Distance | NGC/IC |
|-----------------|--------|------|-------------|------|------|------------|------|-----|-----|----------|--------|
| C4              | CEP    |      |             | 7.1  | 10'  | 80 mm      | o    | o   | -   |          | 7023   |
| M40             | UMA    |      |             | 9.30 | 49'  | 10x50      |      |     |     | 500 Ly   | -      |
| <b>2 nebula</b> |        |      |             |      |      |            |      |     |     |          |        |

## Planetary nebula

| Object                    | Const. | Name           | Description | Vmag | Size | Instrument | OIII | UHC | H-β | Distance | NGC/IC |
|---------------------------|--------|----------------|-------------|------|------|------------|------|-----|-----|----------|--------|
| C6                        | DRA    | Cat Eye Nebula |             | 8.10 | 0.3' | 8x30       | ++   | ++  | -   |          | 6543   |
| <b>1 planetary nebula</b> |        |                |             |      |      |            |      |     |     |          |        |
